**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election Acknowledgment***

1. Acknowledgment is made of the election of group I claims 1-6 and 14-16, without traverse, the non-elected claims 7-13, are withdrawn from the consideration. The non-elected claims should be canceled by the Application during the prosecution of this application.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, rejected under 35 U.S.C. 102(b) as being anticipated by Stiner Us. Patent No. 6,591,222.

Regarding claim 1, Stiner, discloses a reel mechanism with line tension/fish weight indicator with features of the claimed invention including a fishing line, a force or weight transducer, a processor to indicate said force based on applied forces (see claims 1 and 9), the indicator indicating a particular fishing line value, from a plurality of fishing line predetermined test values (see claim 3).

Regarding claim 2, Stiner indicator/processor is well capable of providing any kind stored test value in a digital manner and does not show a spring scale. The use of spring scale for fishing line force measurement, however, is notoriously known, as shown by AAPA,

Art Unit: 2855

presented in for example, figure 3. Therefore, it would have been obvious for a skilled artisan at the time of the invention to modify obvious to use any kind of gauge or scale to show some required predetermined value for any desired comparison.

4. Claim 14, is rejected under 35 U.S.C. 102(b) as being anticipated by Brodribb et al., US. Patent No. 4449317.

Regarding this claim, Brodribb et al., discloses a fishing apparatus with features of the claimed invention including the steps of coupling a line monitoring means, to monitoring a tension in the fishing line (with a transducer), and controlling the line tension force (see claim 1).

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brodribb et al.

Regarding these claims, the monitoring generally can be perform in all related value ranges.

Art Unit: 2855

6. Claims 3-6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 P.M.
